

Appendix A: Table 1*Materials*

Item	Function	Quantity
Informed Consent Form	To obtain participant consent to participate in study	248
Narratives	To prime participants with positive or negative language affect	2
PANAS	To measure positive or negative affect	150
Reysen's Likability Scale	To measure likability of Tomas	1
LIWC 2015	To evaluate language use in open-ended question	1
iPhone 6 Plus	To time study phases for validity	1
Pens	For writing	20
Research Credit Slips	Participant compensation	248
SPSS 15	Data Analyses	1

Note. Materials employed in the completion of both studies conducted.

Appendix B: Figure 1

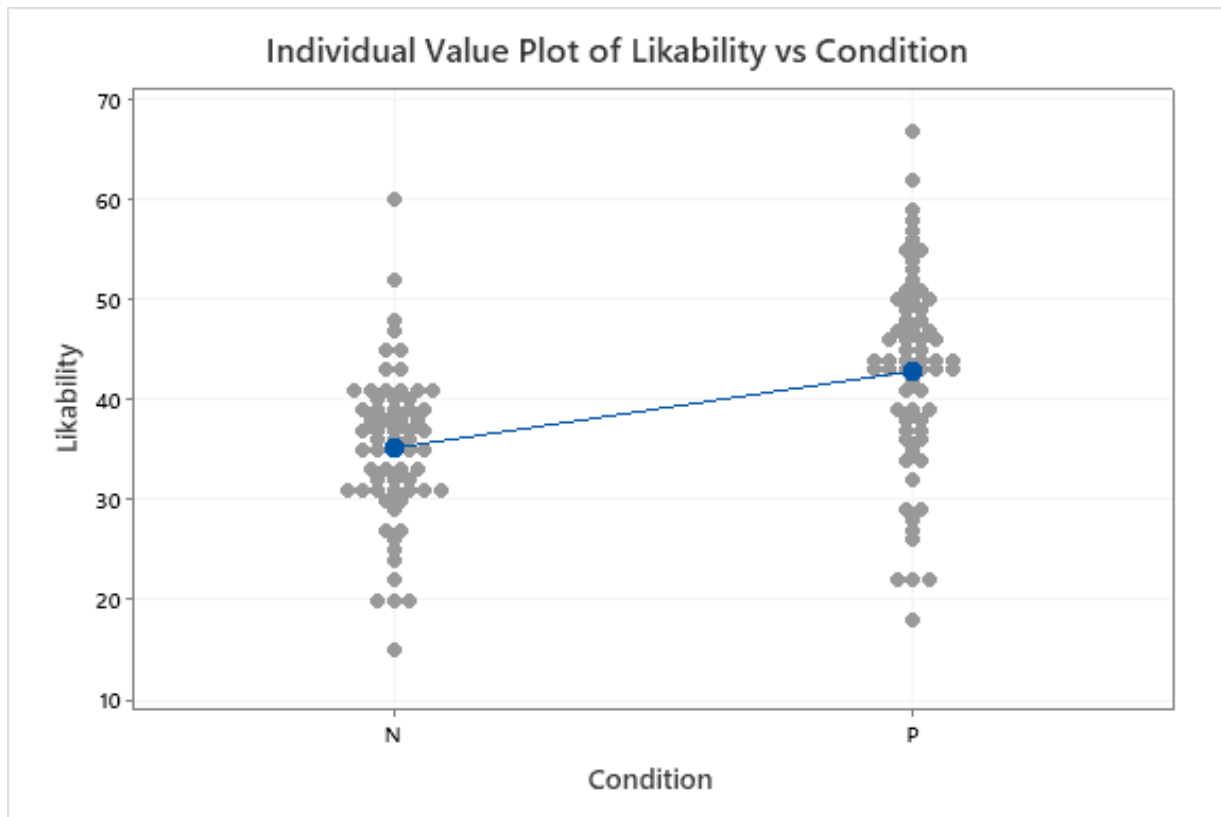

Figure 1: Likability Data - This figure shows the raw data distribution of likability scores in both the negative and positive linguistic affect priming conditions.

Appendix C: Figure 2

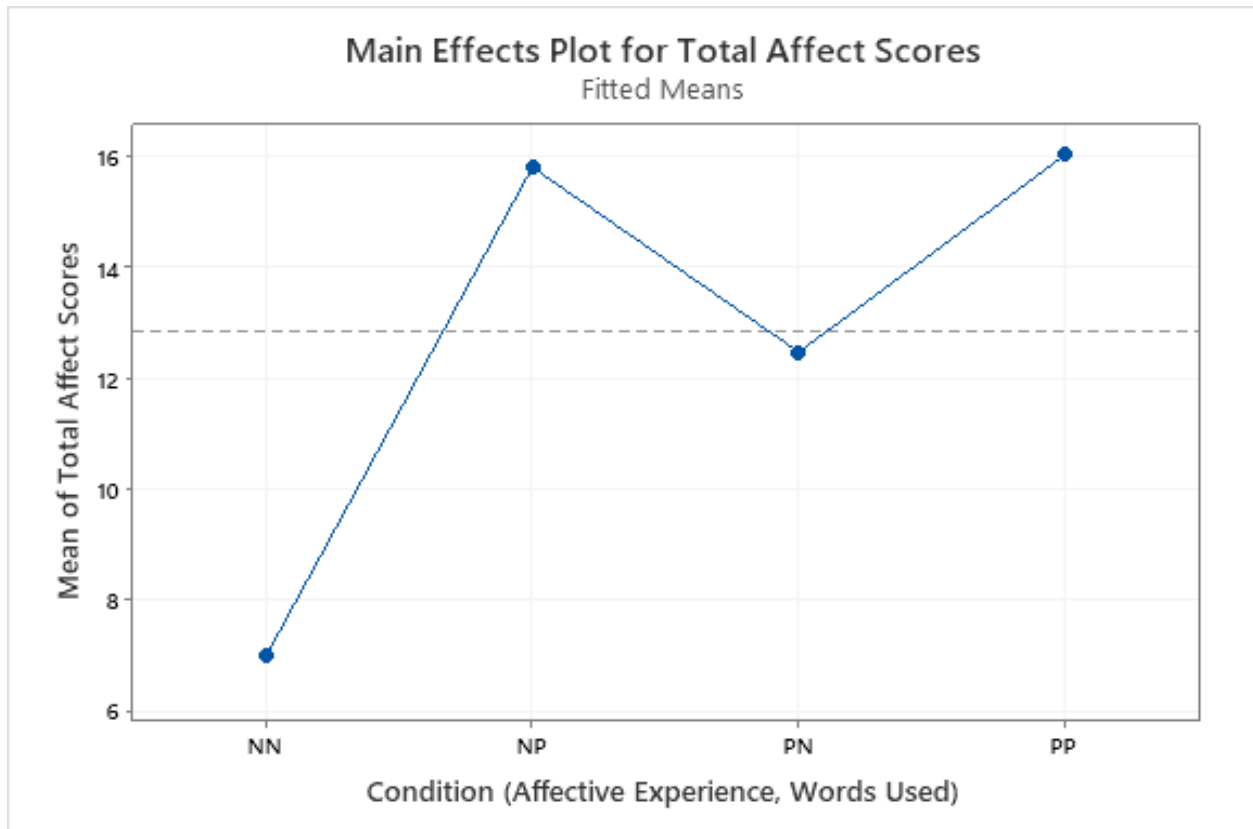

Figure 2: Affect - This figure shows the total affect scores within each condition (NA experience & negative words, NA experience & positive words, PA experience & negative words, PA experience & positive words). Positive words usage greatly increased overall PA.
